

Come join the **Delaware Native Plant Society** for its **Winter/Spring Workshop**. Last year, DNPS contributed to The Meadow Project, an organization producing an environmental film on native plants called Hometown Habitat. We will be showing a short portion of this film and provide an update on the status of its final release. We will also have Jennifer de Mooy from DNREC that will be presenting the recently released "Green Infrastructure Primer for Delaware." Jennifer's background includes a Master's degree in Energy and Environmental Policy from the University of Delaware, and more than 20 years with the Nature Conservancy.

To register your attendance, or for more information, please email Eric Wahl at eric@elementdg.com
